CENTRE

Kiara is the star forward of the school basketball team. But she can't play in the big game unless she faces her final science presentation. Thanks to a lucky little tear in the time-space continuum, Kiara comes face-to-face with Sir Isaac Newton, himself. Unfortunately for Kiara, Newton has more questions than answers. Kiara finds that she must rely on her own power of inquiry - and a lot of help from the audience - to make the scientific discoveries she needs.

Isaac Newton's Excellent Adventure is a high-energy, fun-filled musical adventure of physics, fantasy and fun. This exciting initiative was created by Juno award-winning composers, Judy & David Gershon, in partnership with The Ontario Science Centre. The program includes an unforgettable in-school performance and excellent teacher resource materials to extend the learning through the year.
