COST

Performance, Q&A, Classroom resources and music you can use year-round. Regular price from \$850 per school. Major subsidies available for schools in Halton & Peel.

Made possible by a grant from

An agency of the Government of Ontario
Un organisme du gouvernement de l'Ontario

In partnership with

Kiara has used her school's secret time machine to help her with her science marks. But, now the stakes are higher: Bicycles, teeter totters, balloons, pulleys and more have suddenly ceased to exist! The time machine sends us back in time to meet **Archimedes**. How is he connected to this disaster? How can we restore the historical timeline? Through hands-on demonstrations, Kiara and the audience discover the power of **simple machines** and of the buoyant forces that were a precursor to **flight**. We learn the importance of this science to our modern world and, in so doing, help make everything right again.

Archimedes Moves the World is a high-energy, fun-filled musical adventure of science, fantasy and fun. This exciting initiative was created by Juno award-winning composers Judy & David Gershon in partnership with The Ontario Science Centre. The program includes an unforgettable performance and excellent teacher resource materials to extend the learning through the year.
